
sentry-comments Documentation

Release 0.1.0

Andi Albrecht

January 27, 2014

1	Installation	3
2	Configuration	5
3	Resources	7
4	License	9

sentry-comments is an extension for Sentry to add comments to events.

Important Notice Sentry (≥ 6.4) supports adding notes to events out-of-the-box. So there's no need for this extension anymore.

Comments show up as a new action on the event page:

The screenshot shows the Sentry interface for an event. The event title is "django.core.mail.message in message" with a message "TypeError: sequence item 0: expected string or Unicode, int found". The event occurred 7 minutes ago from the root. A graph shows the event's frequency over time from August 2nd to 9th. The event is at Aug. 9, 2013, 6:27 a.m. UTC [29.4 KB]. The sidebar on the right contains several sections: "Aggregate", "Tags", "Similar Events", "AGGREGATE DETAILS" (Status: Unresolved, First Seen: 6 minutes ago, Last Seen: 6 minutes ago), "This event is not publicly visible.", "ACTIONS" (Mute Event, Comments (1), Remove Event Data). A red arrow points to the "Comments (1)" link in the ACTIONS section.

The comments panel:

The screenshot shows the same Sentry event page, but with the comments panel expanded. The event details are the same. The comments panel shows a single comment: "This is just a test" by Administrator, posted 2 minutes ago. Below the comment is a text input field labeled "Add comment" and a "Comment" button.

Installation

To install the comments extension run:

```
pip install sentry-comments
```

Then add `sentry_comments` to the `INSTALLED_APPS` list in your Sentry configuration:

```
INSTALLED_APPS += ('sentry_comments',)
```

Run **`sentry --config=your.conf.py upgrade`** to create the new tables required by this plugin.

After restarting Sentry you need to enable the plugin for each project on the project's setting page. A new comments panel appears on the event page. Click on the panel title to read or add comments.

Configuration

There are no configuration options yet.
